

ENGINEERING EXCELLENCE

CRAFTED ON

CNC VERTICAL MACHINING CENTER UP TO 5 AXIS ♦ CNC WIRE CUT
CNC TURNING ♦ CNC SWISS AUTOMAT ♦ EDM DRILL ♦ EDM SPARK

...YOUR PARTNER FOR ENGINEERING EXCELLENCE LET US EXPLORE TOGETHER...

Is sophisticated tool room in Gujarat, India. We are leading manufacturers and exporters of precision engineering components, in short to long-term batch quantity using latest technology machines like

- CNC Vertical machining center up to 5 AXIS
- CNC Wire cut
- CNC Turning
- CNC Swiss Automat
- EDM Drill
- EDM Spark

Our design department is equipped with latest design technology software like Unigraphics NX4, Autocad, Mastercam, Elapt and Elcam.

Having rich experience for more than two decades in engineering industry. We are the most sophisticated and leading tool room house of CNC machine that spread over 10,000 sq yard area at its state-of-art manufacturing facilities.

Present setup reflects our company's commitment to become an excellent House of CNC Machines, we acquired nearly two dozens of CNC Machines, high precision measuring instruments and testing equipments. Our strategic focus is on providing superior machining capabilities while designing and implementing processes that are cost efficient.

Our Quality

Growth is natural in development process

PRAGATI

Progressive
Reliable
Affirmative
Growth oriented
Answerable
Trustworthy
Innovative

When there is a progressive mind set with reliable and affirmative team, growth is natural for answerable, trustworthy and innovative people.

Pragati Technologies believe firmly that the growth and development is a fruit of our heartiest effort for customer's satisfaction in all dimension. Quality. Execution of awarded task in time and effective component costing.

Twenty years of improving experience in engineering field and thrust of adopting new technology has made us a confident visionary to explore the export market. We are quite confident to meet requirements of engineering excellence.

We are manufacturing Sheet metal Cutting Dies, Progressive Dies, Electrical Stamping, Motor Stamping, Product Development, Injection Mould, Blow Moulds, Jig Fixtures, Gauges, Typical Dies and Components, mass Precision Components and Parts etc. We offer a complete and comprehensive line of machining services. During past years we have made a huge investment in acquiring most modern and sophisticated machineries and manufacturing equipments in our factory. This is the reason of our success to become a key player in this competitive market.

Serving various industries in India for their tool room requirement we have developed network of trusted local vendors who will meet with our quality standard in our expansion program.

We have large database of the efficient manufacturer to explore the out source opportunity in field like, Electronics, Medical, Aero Space, Pharmaceutical, Automobile and other areas where precision machining and Assembly of complex component is required.
